Streamline type and all direction metal cover design, beautiful appearance and refined art.

Manual or Remote Control operation. Free to stop the screen at any location.

Silver / Grey screen surface, hard to distortion, flame retardant and mildew and induration resistant.

Advantages of Silver / Grey Matt White Screens :

A uniquely designed screen surface with a specifically designed silver finish. This surface is perfect for situations where a silver surface is necessary for a polarized 3-D projection. The Matte finish of this surface successfully rejects ambient light. Screen surface can be cleaned with mild soap and water. Gives higher contrast levels in the image quality. Double sided PVC lamination.
